System Requirements

- Most of computational resources are used on the server-side, with the use of Django, a PostgreSQL database, and a python backend that handles front-end interaction. This minimizes the need for large hardware on the user side, and allows as many devices as possible to be supported.
- Users will be able to access the site through any modern browser that supports Javascript, HTML5, and CSS3. This includes, but is not limited to:
 - Google Chrome
 - Mozilla Firefox
 - Microsoft Edge
 - Apple Safari
 - Opera
- A persistent internet connection is required to use the system to pull data and verify the legitimacy of transactions. This also requires a 99%+ uptime for the server infrastructure to maintain consistency of use for all users. For user connections, a broadband connection should provide enough bandwidth.

Who We Are

About Us

Titan Trading was first founded in January 1, 2018 by a group of nine passionate software engineering students. Each founder had a strong interest in stock and cryptocurrency, so they collaborated to create a platform in which they could gain experience.

Titan Trading

"Prepare for a real market experience." – Timothy Liu

Mission Statement

What you need...

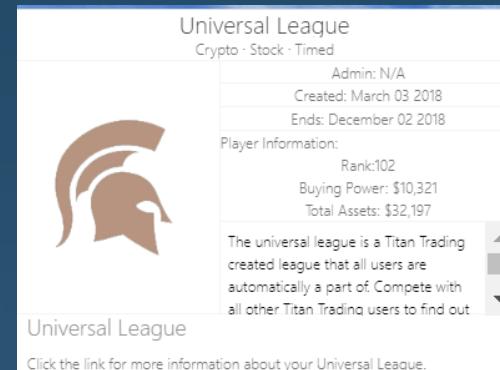

Interested in stocks and cryptocurrencies? Afraid to commit to using real money for fear of loss? Look no further! Your premier stock crypto game is here waiting for you!

We have for you!

Our platform offers real-time stock updates, instant accessibility to the latest news, and Cryptocurrency as an asset. With its competitive environment for users of all skill levels, Titan Trading acts as a catalyst for the transition between amateur investor and self-employed stock broker.

FEATURES

Universal League: Global rankings of every single user on the site. Leaders at the end of every season win a cash prize!

Personal League: Compete with your friends, family, or strangers online!

Trophies: Unlock achievements and milestones as you increase your assets. Gain requirements to access an upper echelon of play.

Goals

Our game will teach the novice trader patters and the basics of stock trading. For the more experienced day-trader, our game will give them a chance to try out new investment strategies, or dive into the uprising popularity of crypto. Our goal is to bring together traders of all levels in a no risk environment to test their skills like a sandbox mode in a video game.
